Open the Program Files Folder, right click on autocad.exe and open Properties. Click on Compatibility tab and set "Windows XP (Service Pack 3)" as the value for "Target framework". Click OK. Run Autocad and see if the error message is displayed. If it is not displayed, make sure you close all Autocad programs before running the file. Winter Driving Safety Tips Winter Safety Tips Winter driving conditions can be hazardous, including wind, rain, snow and slush, ice, sleet, and fog. These conditions can cause you to lose control of your vehicle, a common problem known as hydroplaning. You can reduce the possibility of hydroplaning with the following tips: Start your engine as soon as possible after stopping, and continue to turn the engine on until you start moving. Add power steering fluid to your vehicle to reduce the chances of your steering becoming locked up. Be prepared for poor driving conditions by increasing the distance you drive your vehicle and allow for extra time. Avoid driving at night. When driving at night, your ability to see other drivers and road conditions is reduced. Follow all posted speed limits. Be cautious around other drivers, especially when following another vehicle. Keep your windows up. Fog, ice, or rain can reduce your ability to see other drivers. Take extra time to slow down and avoid excessive speed while driving on roads with deep snow or ice. Be aware of your blind spots when stopping and parking. Listen for drivers who may have difficulty seeing and following you in the dark. Drive with your headlights on. Keep your engine warmed up for several minutes before starting your vehicle. Drive extra carefully when changing lanes. Be aware of other vehicles around you and in the lane next to you. Let more time pass between your stops. Pay attention to your surroundings. Carry a flashlight, cell phone and blanket in your vehicle. Keep your vehicle well-insulated. If you become stranded in the snow or ice, stay where you are and be careful of your surroundings. Driving in snow and ice can be more hazardous than driving in rain and sleet. If you have to drive in snow or ice, be sure your vehicle has proper traction. Fill your tires with a minimum of three quarts of gasoline. To avoid possible ignition problems, let
