Markup import is an indispensable tool for designers. In AutoCAD, markups can be added automatically to your drawings with a click. Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. Markups are simple, flexible, and quick to use. With Markup Assist, new symbols can be added to AutoCAD from the press. The symbols can be modified and applied to multiple drawings for print purposes. Press symbols work even when the symbol's origin is not on your computer. Markup Assist makes it possible to print CAD designs that incorporate press symbols in the print layouts. By enabling the print setting “Use Markup Assisted Prints” for your marker symbols, you can create symbols that are converted into a printable format with the press. In this example, the “Table” press symbol is converted into a printable format. Marker symbols that include patterns or outlines can be printed. The symbol properties in the Symbol Libraries tab in the Customize palette are now optional and are no longer required for symbol export.
