The sharp edge is still there, it just gets blurred. Let say I have a picture of 3 cylinder shape. The picture has sharp edges (see picture). The picture has been blurred with Photoshop so it looks the same but the edges are blurred. My question is, is there any plug-in which helps me achieve this effect? I need to blur the edges not the entire picture. I have tried Adobe Camera Raw with sobel edge but the edges get blurred and the strength of the edge is too strong. Please help. I want to keep the sharp edges but make the edges blur(like "soft edge" filter, round the edges) only a bit. A: I think if you look at the examples in the link that @matt provided in the comments, you will see what you're looking for. Just apply the effect that you want on a "slice" of the image. There are other ways to do it as well, but just looking at the filter effects, you should be able to do what you want with that. HORSE-LESS CARE Horse-free farm care We are equine friendly and do not encourage the use of horses. The virtual facility, although practical to operate and offering the advantages of live stock accommodation, does not simulate the tasks undertaken on a farm and does not have all the features or functions of a standard equine facility. However, we are regularly visited by horses on site and have a training suite and massage room for equine carers. Our coach horses are used to help with transport of produce to market. Virtual farm management Our online farm management and labelling solution allows dairy farmers, fish farmers and other vegetable growers to see their produce from farm gate to consumer, at any time, from anywhere in the world. Centralise records of your produce Growing problems can
